

CPU Holders

The CPU Holder and the Ergonomic Workstation

A highly ergonomic work environment is built around four primary tools—task chair, articulating keyboard/mouse support, adjustable monitor arm and task light—that work together to improve the health and comfort of computer users. The absence of any one of these four tools may impact the ergonomic benefits of the others.

However, additional components such as the CPU holder can further improve workstation ergonomics. CPU holders make CPUs easily accessible while allowing them to be stored out of the way when not in use. They can help prevent injury and strain and facilitate easy removal of the CPU for repairs and IT concerns. And by elevating it off the floor, the CPU holder protects the CPU from dust and damage while keeping the underside of the desk clean and organized.

CPU600

Boasting tool-free CPU installation and removal to minimize down time in busy environments, the CPU600 offers a perfect marriage of form and function. The under-desk track mount with 360-degree swivel capability provides easy ergonomic access to ports, drives, and cables, while also protecting the unit from dirt, vacuums and other workplace hazards.

Made predominantly of recycled aluminum and steel, the CPU600 is 99% recyclable and contains 51% recycled content by weight. Available in Black with Brushed Aluminum or a modern White with Brushed Aluminum finish, it provides the perfect complement to any contemporary workstation.

CPU200

Built to accommodate the smaller profiles of today's technology, Humanscale's latest CPU holder combines superior function and ease of use with stylish aesthetics.

Like its larger counterpart, the CPU600, the CPU200 provides convenient access to ports and cables, quick and easy installation and removal, and an under-desk track mount with 360-degree swivel capability. But the CPU200 is built to house CPUs 1 to 5 inches in width and 6 to 12 inches in height—virtually any compact CPU up to 15 pounds.

Containing 48% recycled and 99% recyclable content, the CPU200 is made primarily of recycled aluminum and steel. Finish options include Black with Brushed Aluminum or White with Brushed Aluminum.

Features and Specifications

	Description	Dimensions	Materials	Recycled Content	Color
CPU600	<ul style="list-style-type: none"> - Adjusts to fit CPUs 3.5" to 9" wide and 12" to 20" tall - Designed to easily support CPUs weighing up to 50 lbs. - Slides smoothly on nylon glides in 16" track - Rotates a full 360° for complete access to cables and ports - Fast and simple tool-free installation via Quick Lock technology 	Height: CPU height +3.6" Width: 7" or CPU width +1.7" (whichever is greater)	Aluminum and cold-rolled, powder-coated steel and plastic	51%	Black/Brushed Aluminum or White/Brushed Aluminum
CPU200	<ul style="list-style-type: none"> - Adjusts to fit CPUs 1" to 5" wide and 6" to 12" tall - Designed to easily support CPUs weighing up to 15 lbs. - Slides smoothly on nylon glides in 16" track - Rotates a full 360° for complete access to cables and ports - Fast and simple tool-free installation via Quick Lock technology 	Height: CPU Height + 3.8" (plus additional 1.2" with spacer option) Width: 6.7"	Aluminum and cold-rolled, powder-coated steel	48%	Black/Brushed Aluminum or White/Brushed Aluminum

Recyclability: All CPU Holders are 99% recyclable

Warranty: All CPU Holders are warranted for 15 years of 24/7 use.
