NUVO

An innovative new design that makes tables fast and easy to assemble, and re-configure. Stunningly beautiful (yet durable) materials: gloss-finished aluminum, the highest grade quarter cut and rift cut veneers, as well as solid surface, laminates and glass. Artfully-designed connectivity and cable management, so that meetings mesh seamlessly with conferencing technology. Nuvo is, well . . . new, in ways that make it an advancement in the evolution of collaborative space.

Nuvo Console: integrated power, data, audio and visual

NUVO | MEDIA

Video conferencing is integrated into the meeting room with Nuvo's Visio table, which provides clear sight lines to the video conferencing camera and monitor mounted on the Nuvo Media Wall. The Media Wall can be wall-mounted on it's own, behind and above credenzas, or even built into a credenza that raises the TV monitor when in use, and stores it safely when not in use.

NUVO | CONNECTIVITY

Nuvo Consoles provide complete connectivity solutions (either in pre-configured or custom configurations), creating table-top power/data/audio/visual modules for every conferencing technology. Best of all, they're easily re-configured, changed and added to - because they're made with the faceplates and components used by every electrician and conferencing technology specialist. So Nuvo tables will never become outdated or obsolete - they're designed to be made "new" again and again.

PowerData Module

NUVO | CABLE MANAGEMENT

Nuvo's unique under-top structure provides the cable management trough system underneath the table-top Consoles, with ample capacity for channeling cabling to the floor. That structure is also designed for fast assembly and dis-assembly of the tables: bases are positioned, then the top sections connected. Enclosed bases have concealed access doors, while the Formed Aluminum base has an optional cable channel for cable management.

NUVO | HUMAN FACTORS DESIGN

Meeting rooms can be high traffic areas, with lots of different users every day. Many Nuvo components feature rounded corners, so accidental contact with tops and bases isn't painful or damaging, and so an additional user can more easily be added around a fully-occupied table. Whether its one table or one hundred, we make every one to your specifications, with precision machining and artisanal pride, and the high standards forged from over 130 years of craftsmanship.

Base cable access

Wood Species/Finish: Glass Top Table with White Palette Bases

NUVO | BASE OPTIONS

Bases feature removable side panels for fast access to the substantial cabling storage capacity inside - making it easy to install and continuously reconfigure conference room technology that is integrated with the table. Cabling is channeled to floor connections underneath or adjacent to the bases. Access for cabling connections, as well as the cabling trough, is provided at the tops of the bases as well. The Formed Metal base has two types of optional cable managers. All bases are weighted to provide stability to the tables. The wood bases may also be finished in Palette solid colors, and the baseplates can be wood or Palette solid finishes, in addition to the standard Gloss Aluminum finish.
