ARCHITECTURAL PRODUCTS

*more than*  
How about <sup>✓</sup>real walls you can move  
fast, with no construction mess...  
that also support your commitment  
to sustainability?

## Faster, more sustainable space division.

Imagine floor-to-ceiling walls engineered for sustainability. TrendWall pre-manufactured modules install without construction mess or waste, and can be rapidly reconfigured with reusable parts, fewer trades and no demolition. And with SCS Indoor Advantage Certification™ on all components, TrendWall helps address indoor air quality and contribute points for LEED projects.

## Smarter, more configurable building options.

3 >

TrendWall offers flexible architectural planning, expanded capacity for utility and technical infrastructure, and integration with both building architecture and systems furniture. In addition, a broad palette of standard surface materials and finishes, plus the capacity for almost limitless custom and special materials, means TrendWall can achieve wall solutions that harmonize with, or accent, an existing interior plan. SHOWN AT RIGHT: TrendWall merges manufacturing and office environments to create a more connected workforce.

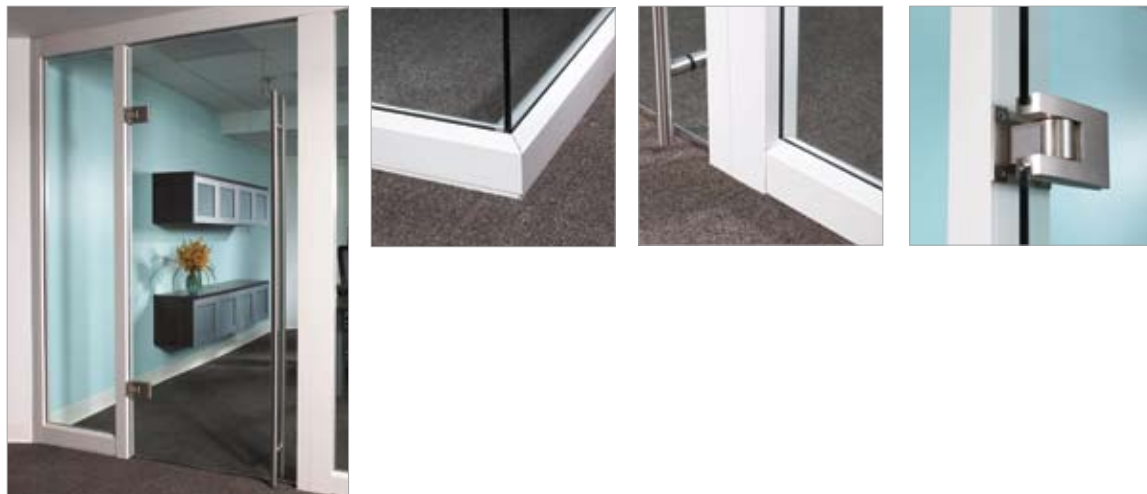

TrendWall Clear, a sleek floor-to-ceiling storefront solution that combines high-end aesthetics with practical features.

TrendWall Clear divides space by using a combination of aluminum framing elements, architectural inspired doors and 1/2" tempered glazing. The system accepts modular power and data, or can be hardwired in the field. It offers several unique architectural door options that truly differentiate it from other systems.

- Full-height Pivot Doors and Flush or Full Lite Sliding Doors.
- Exceptionally simple to install, with a unique, tool-free glass mounting detail.
- Simple, yet elegant, surface material selection.
- All extruded aluminum framing elements can be specified in either Satin Etch (brushed aluminum look), or one of Trendway's many powder coat finishes.
- All 1/2" tempered inserts are available in 3 distinct colors: Clear, Low Iron (colorless), or Frost.

If flexibility, speed and value are important, TrendWall Flooring Solution is a natural fit.

TrendWall Flooring Solution is the practical answer for cable management in today's commercial interiors. Traditional wiring systems are difficult to access when moves, adds, and changes are required. Practical and cost-effective, modular TrendWall Flooring Solution makes reconfiguration simple. Power and data are easily accessed anywhere in the room just by removing a floor access panel. With a non-metallic construction and low 2-1/2" profile height, TrendWall Flooring Solution is simple to install and integrates easily in retrofit and renovation projects.
