TAUPE ARM

EASY ACCESS CHAIR

This chair, designed for hip surgery patients and other applications where a higher seated position is desired, has a removable footrest that is 8" in depth, with a non-slip tread. The footrest can be swung up and inward to facilitate cleaning and eliminate the trip hazard.

WEIGHT CAPACITY

Karma has been laboratory tested to meet a weight capacity of 500 lbs, in all versions: arm and armless, and all widths (including the bariatric size).

WALL SAVER

The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

STACKING

Karma stacks 7 high on the floor, and 12 chairs on the dolly. The optional Underseat Cover can be specified to help prevent indenting of seat upholstery on chairs that will be stacked.

UNDERSEAT COVER

As an alternative to the standard dust cover under the seat, this option, in black polymer, closes off the underside of the chair, functioning as a cleanable Splashguard to protect the interior from moisture. It also assists in chair stacking, by distributing the weight to eliminate any indentations in the seat upholstery.

DESIGNED FOR COMFORT

The seat features an enhanced standard foam thickness, combined with our proprietary webbing suspension system, to provide superior comfort and a longer life cycle. The back is contoured and angled to provide supportive sitting.

TANDEM SEATING

Karma chairs, and inline tables, are designed to be instantly converted to (or ordered as) tandem seating. Armed and armless chairs can be connected - when joining arm chairs the positioning prevents a pinch point between the arms. Inline tables can be configured between chairs or as end tables and the tandem components can be easily removed to convert to freestanding.

SLED BASE

Optional Sled Base frames are available in Silver Metallic and Matte Black. The integrated steel rail spans between the front and rear legs which are fitted with black nylon glides.

REMOVABLE/REPLACEABLE UPHOLSTERY COVERS

Optional Removeable seat and back covers are available on Karma. Replacement removable covers are available for product that was originally ordered with the removable cover option.

FLOOR ANCHORING

Sled base can be supplied with additional holes to allow for fastening through to the floor.

REPLACEABLE COMPONENTS

Seats, backs arms and glides are field-replaceable if they become degraded.

BEHAVIORAL HEALTH

A full complement of options for Behavioral Health applications are available, including a sled base, tamper resistant hardware, weighting, floor anchoring and other features - to help create safer environments for patients and caregivers.

The mark of responsible forestry

All products are air emissions certified and are available as FSC® certified
