

FLEX WALL

Flex Wall is a free-standing glassboard wall system with a fully integrated, omni-directional wheel system built into the base. The wheel system allows Flex to roll easily from room to room — then, this award-winning, revolutionary design seamlessly transforms into a fixed, free-standing, wall partition.

MOBILITY AND STABILITY

Flex Wall has four omnidirectional wheels that allow you to move your Wall from space to space with ease. Turn the lift system clockwise, and it becomes mobile with a 0.5" clearance. Turn the lift system counter-clockwise, and it becomes a sturdy, ADA compliant partition with the help of the stabilizers on both sides of the Wall.

CUSTOMIZE YOUR SPACE

Reconfigure your space in terms of layout and look, allowing you to balance collaboration and privacy in open-concept offices.

SIDE INSERT PANEL COLORS

Acoustic panels come in 14 colors and are made from recycled materials and products. Panels also reduce office noise. XL available in Light Gray and Medium Gray only.

FRAME COLORS

Choose from 13 standard frame color options to make your Flex Wall your own version of style.

SIDE INSERT PANEL COLORS

Side insert panels come standard in Brushed Aluminum. Available in 13 different powder-coated finishes.
